

EDUCATION

Nanyang Technological University (NTU), Singapore Bachelor of Engineering (Mechanical Engineering), Second Class Honours	Aug 2014 – Jun 2017
Exchange Programme, Memorial University Newfoundland (MUN), Canada Gained tremendous cultural exposures and built international networks both in school and when travelling.	Sep 2015 – Dec 2015
Temasek Polytechnic (TP) Diploma in Aerospace Engineering	Apr 2009 – Apr 2012
Singapore Sports School (Badminton)	Jan 2005 – Dec 2008

PROFESSIONAL SUMMARY

Results-driven technology consultant and product owner with 9 years of experience at the intersection of business and technology. Proven track record of translating complex operational requirements into scalable digital solutions - spanning full-stack development, computer vision, digital twins, process automation, and enterprise system integration. Adept at leading cross-functional teams and owning end-to-end product delivery across supply chain, manufacturing, and logistics domains.

WORK EXPERIENCE

Hyundai Motors Group Innovation Center, Singapore (HMGICS) <u>Innovation Consultant</u>	Aug 2024 – Present
- Built an auto-labelling application for computer vision model training supporting a pick-and-place robotics use case, cutting manual annotation effort by ~90% and significantly accelerating AI-driven model development. - Led strategy and end-to-end delivery of a non-intrusive systems monitoring platform capable of detecting issues in legacy systems without source-code modifications. - Architected a master data model for supply chain operations, standardising product, supplier, and location data to improve data quality, system integration, and end-to-end visibility. - Owned the full feature lifecycle - refactoring codebases for maintainability while integrating frontend applications with backend services. - Analysed and documented process and data flows across multiple legacy systems, identifying constraints and designing innovative solutions to enhance functionality and integration. - Designed and implemented microservices with real-time data synchronisation to ensure consistency across distributed systems. - Managed cross-functional teams to deliver multiple innovation and integration initiatives in parallel, ensuring on-time delivery, optimal resource utilisation, and alignment with strategic objectives. - Mentored team members and cultivated a culture of agile delivery, design thinking, and continuous improvement.	

SGTraDex

<u>Digital Transformation Manager</u>	Jan 2023 – Aug 2024
- Built and deployed VesselNow (React.js, Python Flask, MySQL, WebSocket, AWS EC2/RDS/S3/Elastic Beanstalk/CodePipeline) — a real-time vessel tracking platform enabling external users to search live vessel locations and pilotage information, with timestamp-change notifications and data export capabilities for downstream automation. - Developed a Dynamic Form Solution (Python Flask, MySQL, AWS EC2/RDS/S3/Elastic Beanstalk/CodePipeline) — an intuitive platform for external users to complete dynamic forms online, with automated data extraction from AWS S3 and RDS, and a Power BI dashboard for data visualisation and decision-making. - Streamlined the Internal Billing System by integrating DocuSign and Xero (Python Flask, React.js, Power Automate, VBA, AWS), automating billing workflows to reduce manual effort and errors; built a PayNow QR code generator that auto-populates invoice details, ensuring reference integrity on payment receipts. - Drove end-to-end data engineering lifecycle: gathered business requirements, defined KPIs, transformed requirements into data deliverables, and managed deployment of data products.	

DB Schenker

Assistant Manager, Operations Excellence

Jan 2021 – Jan 2023

- Led a team of five analysts.
- Achieved >150,000 SGD annual cost savings, reducing operational man-hours by >6,000 hours/year.
- Introduced Ghostscript in python as well as converting files from PY to EXE, enabling the development of customised in-house applications.
- Streamlined and further automate better methods of retrieval to shorten the preparation time, using tools such as Python, Excel VBA, Power Apps, Power Automate, Share Point and RPA.
- Removed manual SAP and Excel processes via automation, saving time as well as reducing fatigue and error rates.
- Assisted in-house workshops as a Power Apps consultant.
- Designed and led Power BI training for staff.
- Designed a website using python with the ability to send SMS.

DHL

Business Intelligence Analyst

Jan 2020 – Dec 2020

- Provide operational performance reporting to DHL's top 100 customers and management on a regional and global level, following agreed and optimised processes.
- Analyse operational processes and data, to identify root causes for trends and issues at customer, sector/industry or product level.
- Proficiently use a variety of reporting and analysis systems made available for CSI and other business units. I.e., Crystal, Power Bi, SQL, UiPath.

Product Owner / Pricing Analyst

Aug 2017 – Dec 2019

- Business Champion and co-creator of KIWI+, a global web-based platform for Key Account Pricing teams, supporting 400+ users across 80+ countries.
- Developed the logic and criteria for an auto-assignment feature, saving approximately 1 FTE per day in manual processing.
- Scripted user stories and acceptance criteria; managed the full UAT process in collaboration with EU/AM business teams and UX/web development teams.
- Conducted training for 100+ users across APAC and produced role-specific user guides to support system adoption.
- Conducted customer pricing analysis for 15+ countries in APAC, generating reports with pricing recommendations, opportunity snapshots, and lane/weight-break breakdowns.

ACHIEVEMENTS AND AWARDS

Professional Scrum Master™ I (PSM I)	2023
DMAIC Bronze Award (Continuous Improvement)	2019
Institute-Varsity-Polytechnic (IVP) Games Champion	2011, 2017
Singapore University Games Champion	2015
Most Valuable Player for School of Mechanical and Aerospace Engineering	2015

SKILLS

Programming: Product Ownership & Delivery • Process Automation • Full-Stack Development • Computer Vision & AI • Digital Twin Solutions • System Integration • Data Analytics & BI • Cross-Functional Leadership
Tech Stack: Python • React.js • Flask • SQL • Power BI • Power Apps • Power Automate • AWS (EC2, RDS, S3, Beanstalk) • Docker • Rancher • GitLab • ThingWorx • SAP • WebSocket • REST APIs • Microsoft Office (Excel, Word, PowerPoint, Access) • VBA • UiPath
Interests: Badminton, Guitar, Photography, Travelling
